

We have been informed that the new broadcast service Low Power FM may force a very important radio station off the air--K-LOVE (90.7 in Oxford, MS). K-LOVE is EXTREMELY important to my family and our community because it provides a safe, clean, positive and encouraging radio alternative not only to fellow believers but to the entire community. It is the ONLY station my family will listen to and is 100% family focused. We cannot afford to lose the one safe radio station in our area. KLOVE provides this safe alternative to communities all over the country and is a vital part of many families' lives. I urge you to please consider the possible affect this new service may have on existing stations. Please allow us as Americans to continue to have a voice and a choice in radio by keeping KLOVE on the air. Thank you for your time and consideration.
